

Kiran Vijaykumar Choudhari

Devops Engineer

+917411971510 ◇ choudharikiranv2003@gmail.com ◇ Bengaluru, India ◇ [LinkedIn](#) ◇ [GitHub](#)

SUMMARY

Associate-level DevOps Engineer with hands-on experience in CI/CD automation, Dockerized deployments, and cloud operations on Azure and Google Cloud. Experienced in supporting development teams, managing dev/prod pipelines, and improving system reliability through monitoring and automation.

EXPERIENCE

AI Intern

Sep '25 — Nov '25

Crafttech 360

Bangalore, India

Project: Cheeko AI Toy - An AI-powered screen free toy for kids

- Designed and implemented **CI/CD pipelines using CircleCI and Azure**, automating build, test, and deployment workflows for backend and ML services.
- Containerized backend and ML services using **Docker**, defining reproducible Dockerfiles and environment configurations to ensure consistency across development, staging, and cloud deployments.
- Deployed and managed backend services on **Azure Cloud**, integrating **PostgreSQL** for persistence and **Redis** for caching to improve performance and reliability.
- Designed **separate CI/CD pipelines for development and production environments**, triggered by branch-based workflows (dev and main), ensuring controlled and reliable releases.
- Developed a **PowerShell automation script** to orchestrate startup of multiple dependent services with a single command, standardizing local development workflows and reducing environment setup time for developers.
- Implemented **Datadog-based monitoring and alerting** for containerized services, tracking CPU, memory usage, request latency, and error rates to proactively identify performance and stability issues in production.
- Integrated **Sentry for error tracking and exception monitoring**, enabling faster debugging and improved incident response.
- Configured **PM2 process manager** for running and managing backend services in production, enabling process monitoring, restarts, and improved application stability.
- Implemented **branch-based deployment strategies** to deploy changes selectively to development or production environments based on Git branch policies.

PROJECTS

DokGuru – AI-Powered Document Platform [Link](#)

Nov '25 — Present

- Designed and maintained **CI/CD pipelines using GitHub Actions** for automated build, test, and deployment of backend services.
- Deployed containerized services to **Google Cloud (Cloud Run)**, enabling scalable, repeatable, and fault-tolerant deployments.
- Integrated monitoring-friendly architecture with **retry logic and fallback mechanisms** to improve service availability during outages.
- Collaborated across **frontend** and **backend** components to ensure smooth release cycles.
- Managed environment configuration and deployment variables for Dockerized services across development and production environments.

SKILLS

DevOps & Cloud Docker, CI/CD, GitHub Actions, CircleCI, Azure, Google Cloud (Cloud Run), Linux, Datadog, Sentry, Monitoring & Alerting

Programming & Scripting: Python, JavaScript, Bash (Scripting Language), PowerShell

Backend & Datastores Node.js, Express.js, Flask, FastAPI, SQL, MongoDB, PostgreSQL, Redis

Tools & Concepts Git, REST APIs, Infrastructure Automation, Deployment Strategies, System Reliability, SDLC

EDUCATION

B.E. in Artificial Intelligence & Machine Learning, MVJ College of Engineering (GPA: 7.4)

Dec '21 — Jun '25

PUC in PCMB, Tungal Independent PU College Vijayapura (GPA: 90%)

Jun '19 — Jul '21

SSLC, M E S High School Chadchan (GPA: 86%)

Jun '18 — Apr '19

CERTIFICATIONS

Generative AI Certified Professional, Oracle

Jul '24

Git For Beginners, Udemy

Feb '24

Google Cloud Skills Boost, Google
